Market Statistics

Top 10 UK CAD Packages

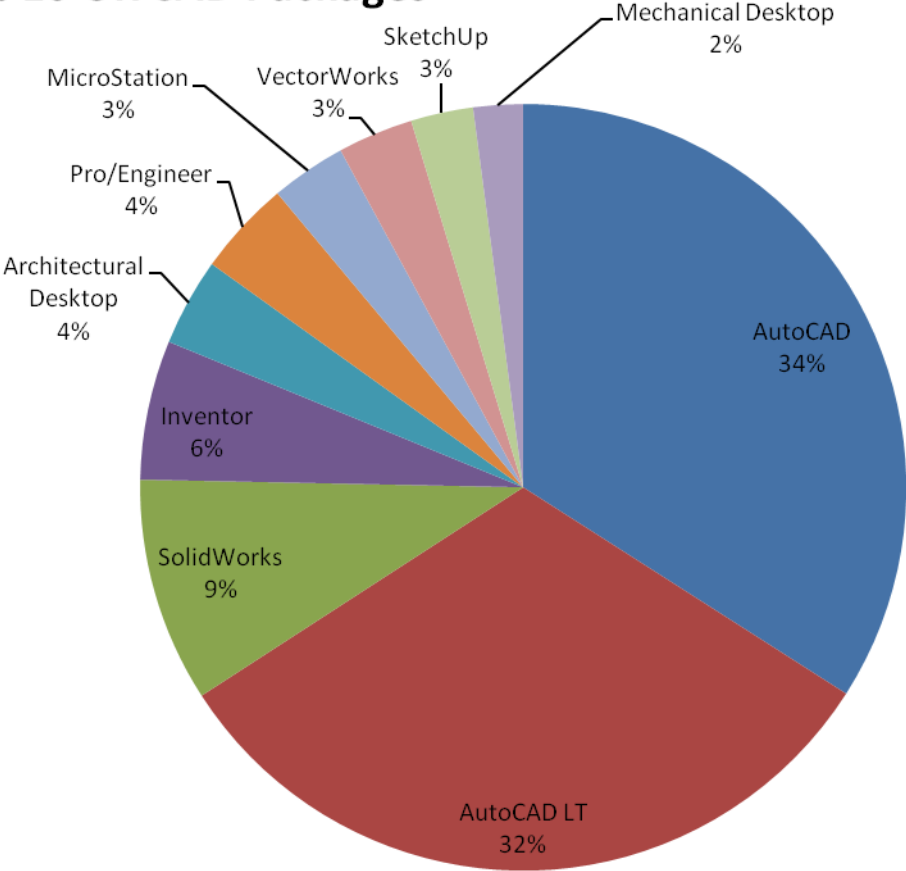

iCAD is produced by Business Advantage, a B2B research, business development and marketing consulting practice operating in the global IT, Digital and Telecommunications sectors.

Name of Application	No of Sites
AutoCAD	5,392
AutoCAD LT	5,039
SolidWorks	1,499
Inventor	931
Pro/Engineer	636
Architectural Desktop	586
VectorWorks	504
MicroStation	503
SketchUp	417
Mechanical Desktop	332

The Business Advantage UK CAD/CAM User Site database enables us to analyse data by various criteria including details on who is using which package. Not intending to be the universe of UK CAD/CAM users and thus not represented as precise market shares, the Business Advantage database nevertheless contains intelligence on some 15,000 user sites. It therefore gives an indication of the overall number of sites using particular packages and a 'steer' on popularity and usage.

AutoCAD and AutoCAD LT continue to dominate the scene although the number of SolidWorks, Inventor, Microstation and VectorWorks user sites have all increased since the survey was last conducted (2007), mainly at the expense of AutoCAD. **Google SketchUp** features in the Top 10 for the first time. The chart below displays the same information by percentages:
